# Project Design Phase-II Technology Stack (Architecture & Stack)

| Date          | 03 October 2022                             |  |
|---------------|---|--|
| Team ID       | PNT2022TMID24103                            |  |
| Project Name  | Project - A Gesture- based tool for sterile |  |
|               | browsing of Radiology Images                |  |
| Maximum Marks | 4 Marks                                     |  |

## A GESTURE BASED TOOL FOR STERILE BROWSING OF RADIOLOGY IMAGES

#### **Technical Architecture**

### Table-1 : Components & Technologies:

| S.No | Component                       | Description  | Technology                             |  |
|------|---------------------------------|--|--|--|
| 1.   | User Interface                  | How user interacts with application e.g. Web UI  | HTML, CSS, JavaScript.                 |  |
| 2.   | Application Logic-1             | Upload image in an application   | Python                                 |  |
| 3.   | Cloud Database                  | Database Service on Cloud  | IBM DB2, IBM Cloudant etc.             |  |
| 4.   | Machine Learning Model          | Purpose of Machine Learning Model  | Object Recognition Model, etc.         |  |
| 5.   | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration: | Local, Cloud Foundry, Kubernetes, etc. |  |
| 6.   | Convolutional Neural Network    | Initialize the model   | CNN Layer                              |  |

### **Table-2: Application Characteristics:**

| S.No | Characteristics        | Description   | Technology      |  |
|------|------------------------|---|-----------------|--|
|      |                        |   |                 |  |
| 1.   | Open-Source Frameworks | List the open-source frameworks used Technology of Open source frameworks |                 |  |
| 2.   | Scalable Architecture  | Justify the scalability of architecture (3 – tier,                        | Technology used |  |
|      |                        | Micro-services)   |                 |  |
| 3.   | Availability           | Justify the availability of application (e.g. use of                      | Technology used |  |
|      |                        | load balancers, distributed servers etc.)                                 |                 |  |
| 4.   | Performance            | The system responds to the user in a second and                           | Technology used |  |
|      |                        | the hardware and software works well                                      |                 |  |
